

Who We Are

About Us

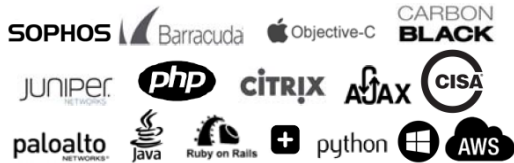

ALFATEK is an IT Managed Service Provider and a Software Development Group that offers management for the enterprise networks, covering all of the subjects from managing the Domain Controllers, network peripherals, Web-Traffic, Firewall Security, Databases and storages to integration with cloud base SaaS, PaaS and IaaS solutions. Additionally, our development team provides software and app development that is produced based on the client requirements and specifications. ALFATEK offers more business services directed to simplify your business processes and to offload your internal resources.

Core Capabilities

Network Infrastructure

Our team designs maintain and operate for our customers their backend network peripherals that enable network connectivity, communication, operations and management of an enterprise network.

System Engineering & Administration

We have extensive experience managing client-server infrastructures and system integrations with cloud solutions.

Solution Development & Integration

ALFATEK's team has knowledge and expertise in custom implementation and integrations of 3rd party solutions into corporate environments and public web properties.

Application & Software Development

Our development team provides software and app development that is produced based on the client requirements and specifications.

Onsite & Remote IT Support

To ensure our client businesses operate efficiently, our IT staff provides remote and on-site client support services supporting various technologies, application suites and on-site peripherals.

Website, Social & Blog Development

We experienced in all facets of web development including graphic design, custom websites for the internet or an intranet, portals, blogs and other custom services.

BIG DATA Services, Cyber Security, Perimeter Security Assessment and Microsoft Office 365 Training

Differentiators & Competitive Advantage

Our main goal is to reduce cost while increasing effectiveness. We know how IT should operate since ALFATEK is formed and managed by IT Experts.

- ALFATEK has developed its own COTS software products to assist in the automation of functions of the business, AIM (aimxpert.com) and cross-monitoring and alerting platform MONX (monxpert.com).
- Experience implementing modernization strategies and cutting-edge technologies.
- 24/7 Emergency Service, National Coverage
- Decades of IT Program Management and IT Operating Experience
