

# Mailman Unlimited ++

---

Mailman is open-source software for managing electronic mail discussion and e-newsletter lists. With the designed add-on, the Mailman system is converted into a complete enterprise solution that can address unlimited email needs for the marketing groups.

# Feature List - Mailman Base

---

- Through-the-web list creation and removal (with automatic support depending on the MTA)
- Multi-lingual support: list web pages and email notices can be in any of nearly two dozen supported language, configurable per-site, per-list, and per-user
- "Real name" support for members
- Support for personalized deliveries and VERP-like message delivery for foolproof bounce detection
- Emergency moderation
- MIME-based content filtering, with demime/stripmime like options
- Regular expression-based topic filtering
- Through the web membership management
- Through the web administrative requests pages
- Moderated newsgroup support
- Flexible moderation and privacy controls
- Subscription invitations
- Auto-response controls
- User controllable delivery options
- Urgent: header support (bypasses digests to reach all users immediately)
- Virtual hosting support, with no list name restrictions
- Single user account to manage all subscription addresses
- Users can specify a preferred address to use by default
- Flexible architecture for integration with your own site
- REST-based API for the core system
- Completely revamped and improved web user interface (Postorius) and default archiver (HyperKitty).

# Feature List - Mailman Unlimited ++

---

1

## LDAP Integration

- An LDAP integration allows your instance to use your existing LDAP server as the master source of user data. Administrators integrate with a Lightweight Directory Access Protocol (LDAP) directory to streamline the user login process.

2

## UI Customization

- Customization lets users make their own selections about what they want to see or set preferences for how information is organized or displayed. It can enhance user experience because it allows users to control their interaction.

3

## Automation

- Email automation is a powerful marketing automation tool that lets you send the right message to the right people at the right time, using automated workflows.

4

## New features requests

- Feel free to make mailman your own and adapt it to your needs! Any customization for any business needs.

# Deployment Packages

---

## Tier 1

- Mailman Suit Deployment
- Containerization - allows for maintainable on-site or cloud deployments
- Auto-scaling and high-availability

## Tier 2

- Mailing list automatic uploads
- Configure scheduling for distribution

## Tier 3

- UI Customization
- New Feature requests
